

OSID-DE Diagnostic Tool (V5.04.05) Release Notes

March 2025
Doc. No. 38140_00

Contents

1 Preface.....2

2 Some Useful Improvements and Additional Features.....2

1 Preface

This document covers the release notes of the OSID-DE UL268 7th Edition Diagnostic Tool (V5.04.05) for OSI-10 UL268 7th Edition detectors only.

The new version can be downloaded from [Xtralis Website](#).

Important Note!

This new version is not backward compatible with the UL 6th Edition detectors, which should continue to be commissioned using OSI-10/OSI-90 UL 6th Diagnostic Tool (V3.00.05) available on Xtralis Website.

2 Additional Features

This version includes the following improvement:

- Diagnostic and commissioning of OSID-DE UL268 7th OSI-10 devices equipped with firmware version (5.04.05).

3 Additional Notes

Please consider the following:

- This software cannot be used to upgrade or downgrade the firmware version of the OSID-DE detector.
- This software cannot be used for the diagnosis and commissioning of OSID-DE UL268 UL 7th OSI-90 devices with FW version 5.03.00. For those devices, please download and use "OSID-DE Diagnostic Tool (V5.03.00) for EN54 Territories and OSI-90 Devices (Doc. No. 35606)" which can be found on Xtralis Website.
