## Cutter

## Overview

These cutters provide an excellent flush cut when precision is needed. They are ideal for trimming of conductors with our Tool-less MAX<sup>®</sup> Modules and TERA<sup>®</sup> outlets/plugs as well as S110<sup>®</sup> and S210<sup>®</sup> patch plugs. The cutters are forged from high quality alloy steel for maximum strength and durability. The cutting edges are machine ground and electronically hardened for extended life and the steel joint maintains a perfect cutting edge and tip alignment for excellent consistency. Handle coil springs and cushioned grips allow faster action and greater comfort with reduced user fatigue.
