

T-6232TM MICRO INTELLIGENT PA SYSTEM CONTROLLER

Product Overview

The T-6232TM Micro Intelligent PA System Controller is a versatile, compact solution designed to meet the broadcasting needs of small-scale venues like kindergartens, schools, small factories, supermarkets, malls, churches, and other public spaces. By integrating a broad range of advanced features, this system ensures seamless audio distribution, intelligent control, and reliable operation.

System Features

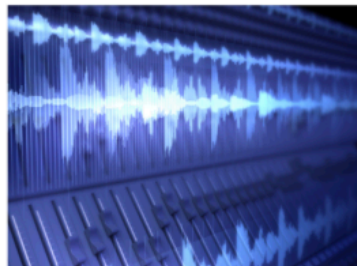

01. User-Friendly Touch Interface

- 7-inch capacitive touch screen with a resolution of 1024×600
- Real-time system status monitoring
- Touch control and physical buttons

02. Powerful Processing and Storage

- Quad-core Cortex-A35 processor (1.3GHz)
- Built-in 16GB storage for customizable music and alarm signals

03. Flexible Audio Control

- Two microphone inputs with 48V phantom power
- Multi-format USB playback
- 10-zone output management
- Independent volume adjustment for each input
- Emergency microphone with priority
- Synchronous recording and storage of audio source

04. Scheduling and Automation

- Timed task programming for automated audio playback
- Support for daily, weekly, and monthly broadcast schedules
- Up to 99 automatic playback tasks per day
