## BRAND STORY

The predecessor of Coolmay Technology is Coolmay apparel, which initially started with the production of lace machines. This kind of device is low value but it is difficult for users to make after-sales budgets. In addition, they lacked professional maintenance technology, which made after-sales maintenance difficult. If any problem, they had to come to the manufacturer for help, which caused cost increasing for both parties. How great it would be if after-sales problems could be solved without door-to-door service!

Coolmay decided to develop one controller to solve this problem, and created the first HMI/PLC all-in-one in China in 2006. The all-in-one integrates the functions of PLC and HMI, including the highly integration of logic control, analog input and output, high speed counting, high speed pulse, communication, etc.. It supports arc interpolation and linear Interpolation. This device made after-sales maintenance very simple and greatly reduced the maintenance cost of the entire equipment. Users do not need to have professional technology but just simply replace the all-in-one if any problem.

Soon after entering the market, the actual effects of the product emerged. After using the all-in-one machine, the after-sales problem that a certain textile equipment manufacturer could not solve for many years was solved instantly, which reduced 90% after-sale cost.

This made Coolmay determine to engage in the all-in-one industry more firm. It is this force that drives Coolmay to embark on a new path of automation control concept.

## Simple operation. Flexible. Cost-effective

Coolmay L02 series PLC is a high-performance controller specially designed for automation equipment. L02 series modules can be expanded up to 31 units.

It is powerful positioning control function, and can support up to 8 axis high-speed pulse control at the same time, suitable for various automation equipment, such as electronic manufacturing, labeling, food packaging, textile equipment and other industry equipment.

The L02 series host has a built-in communication network and communicates with the Ethernet/IP industrial network to realize high-speed data transmission.

Dial switch to set up IP, quickly build a network environment, built-in multiple sets of industry-specific functional modules, convenient for customer applications, and can set multiple password protection to improve system security.

The snap-in buckle design allows the module to be replaced "straight up/down" for easy installation.

The appearance is compact, the dark gray case is anti-fouling and anti-dirty, suitable for harsh industrial environments.

Order guide

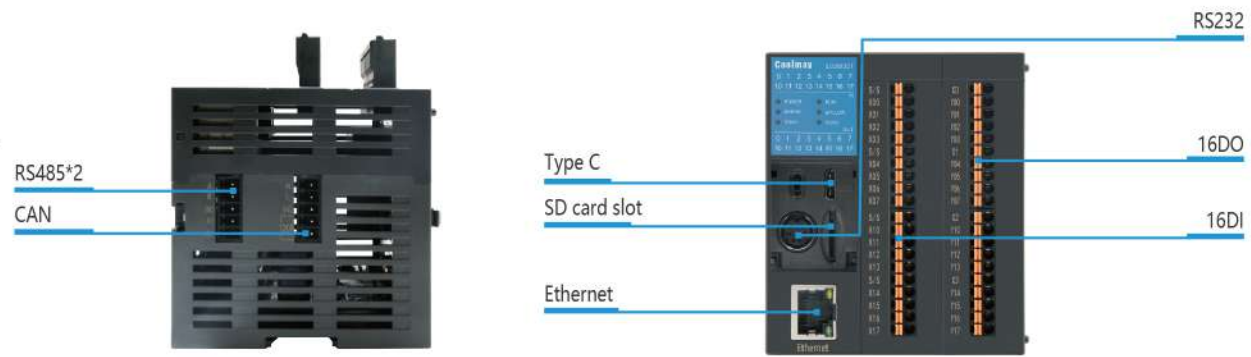

## L02 series host motion control system

- Supports up to 8 axis servo control, 6 groups of high-speed counter inputs
- Support digital, analog and temperature module expansion (max 31 units)
- Provide high-speed computing speed: the fastest execution speed of basic instructions can reach 0.35μs
- Provide multiple motion control commands such as position, speed, positioning and interpolation
- Built-in maximum 16DI/16DO, 1x RS232, 2x RS485, Ethernet and CAN interfaces

### Integrated host design

- L02 host motion controller has built-in multiple I/O and communication interfaces, which can meet the market demand for compactness, high performance and high value.

## High efficiency computing power

- Super function. Compatible with FX3G/FX3U/FX3S series PLC, fast running speed
- 32K program capacity, 32K retentive register, support positioning, interruption, linear arc interpolation, PID auto-tuning
- Special encryption, prohibit reading data

### CPU performance is greatly improved

#### High-speed computing

- Maximum I/O: 512 points
- Program capacity: 32K steps
- Data storage: 32K words
- Maximum expansion module: 31 units

Basic instruction:	0.35μs
Application instruction:	0.642μs

### Execution efficiency optimization I/O update

#### L02 series cycle scanning method

Program cycle scan mode

#### L02 series update

Automatic address allocation, expansion module plug and play

### Data is stored permanently, no battery required

#### Use permanent preservation, write to Flash instantly after power off

Power-off retention area, permanently maintained

#### Perpetual calendar timing function, applied CR1220 batteries

Drawer type, can be installed by anyone

When PLC is powered off	
PLC program area	Permanently maintained
Power-off retention area	Permanently maintained

When PLC is powered off	
Perpetual calendar	Time keeping

Battery CR1220

## Powerful axis control - positioning control solution

### Positioning control, high-speed pulse

- L02M32T/ L02M24T transistor CPU: 8-axis (4-axis 150KHz + 4-axis 50KHz)
- Support positioning, can quickly complete the support positioning function, up to 8 axes
- Specify Y0, Y1 for continuous interpolation. Support Z axis (under development)
- The control of each axis is commanded, the PLC program is highly readable, and the maintenance is convenient

### High-speed counter

- Real-time high-precision monitoring: 6 channels of 60 KHz
- Up to 6 external input interrupts

## Easy installation

### Design for easy installation

Space saving, most suitable for installation in mechanical equipment

### Easy installation

Open the white buckle, align the expansion interface and push the module directly in, press the white buckle at both ends to complete the installation.

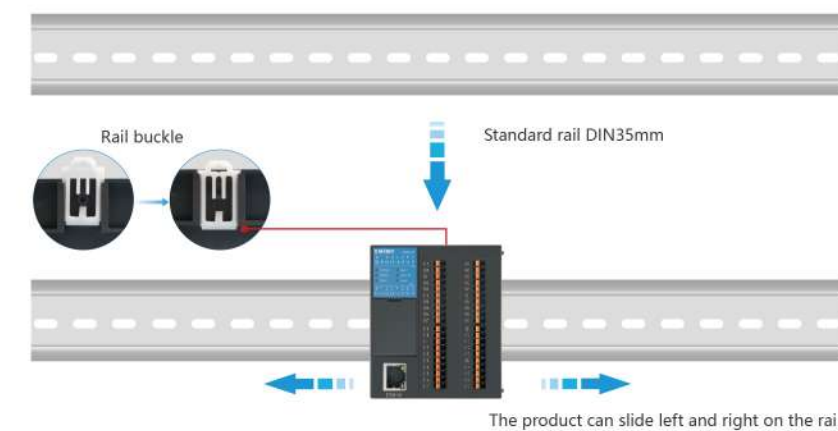

### Applied press-type terminal wiring

- No screwdriver required for installation, convenient and fast

### Rail mounting

The CPU module and the expansion modules can be directly installed on the standard rail DIN35mm without a backplane. Press the rail buckle to directly lock the product on the rail.

Put into the rail card slot, press the rail buckle, the installation is completed.

## Industrial network solution I

### Ethernet/IP solution

The communication bus protocol adopts the standard Ethernet/IP communication bus, which can easily realize barrier-free connection with Ethernet/IP PLC or industrial computer. The communication interface mode is 2 RJ45 Fast Ethernet interfaces, and the internal port switching function has been implemented, so multiple slave stations can be easily cascaded without adding a switch.

The module communication interface supports the Ethernet/IP bus protocol, conforms to the IEC61158 standard and GB/T25105 standard, and can realize the seamless connection of mainstream Ethernet/IP master stations

- Integrated dual-port switching function, convenient to achieve linear topology
- Use dial switch to set the IP address, 192.168.IP1.IP0, simple and convenient
- Applied standard DIN35 rail installation, fixed with buckles

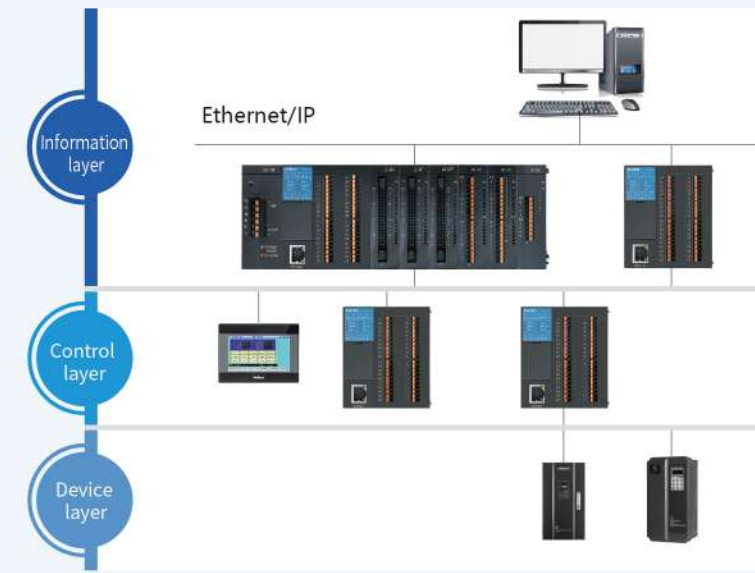

### Technical specifications

Communication bus		
Bus protocol	Ethernet/IP	
Connection method	RJ45	
Communication rate	100Mb/s	
Communication distance	100m (Station distance)	
Status, alarm, diagnosis		
Power status display	Green RUN LED light	
Network port indication (Flashes when there is data exchange)	Green LINK1 light corresponds to LAN1	Green LINK2 light corresponds to LAN2

## Industrial network solution II

### Flexible network system creation

- Support star-shaped, linear network topology, can quickly expand and manage production lines
- Compatible with IT network, no need to cut the network or maintain by professional IT technicians

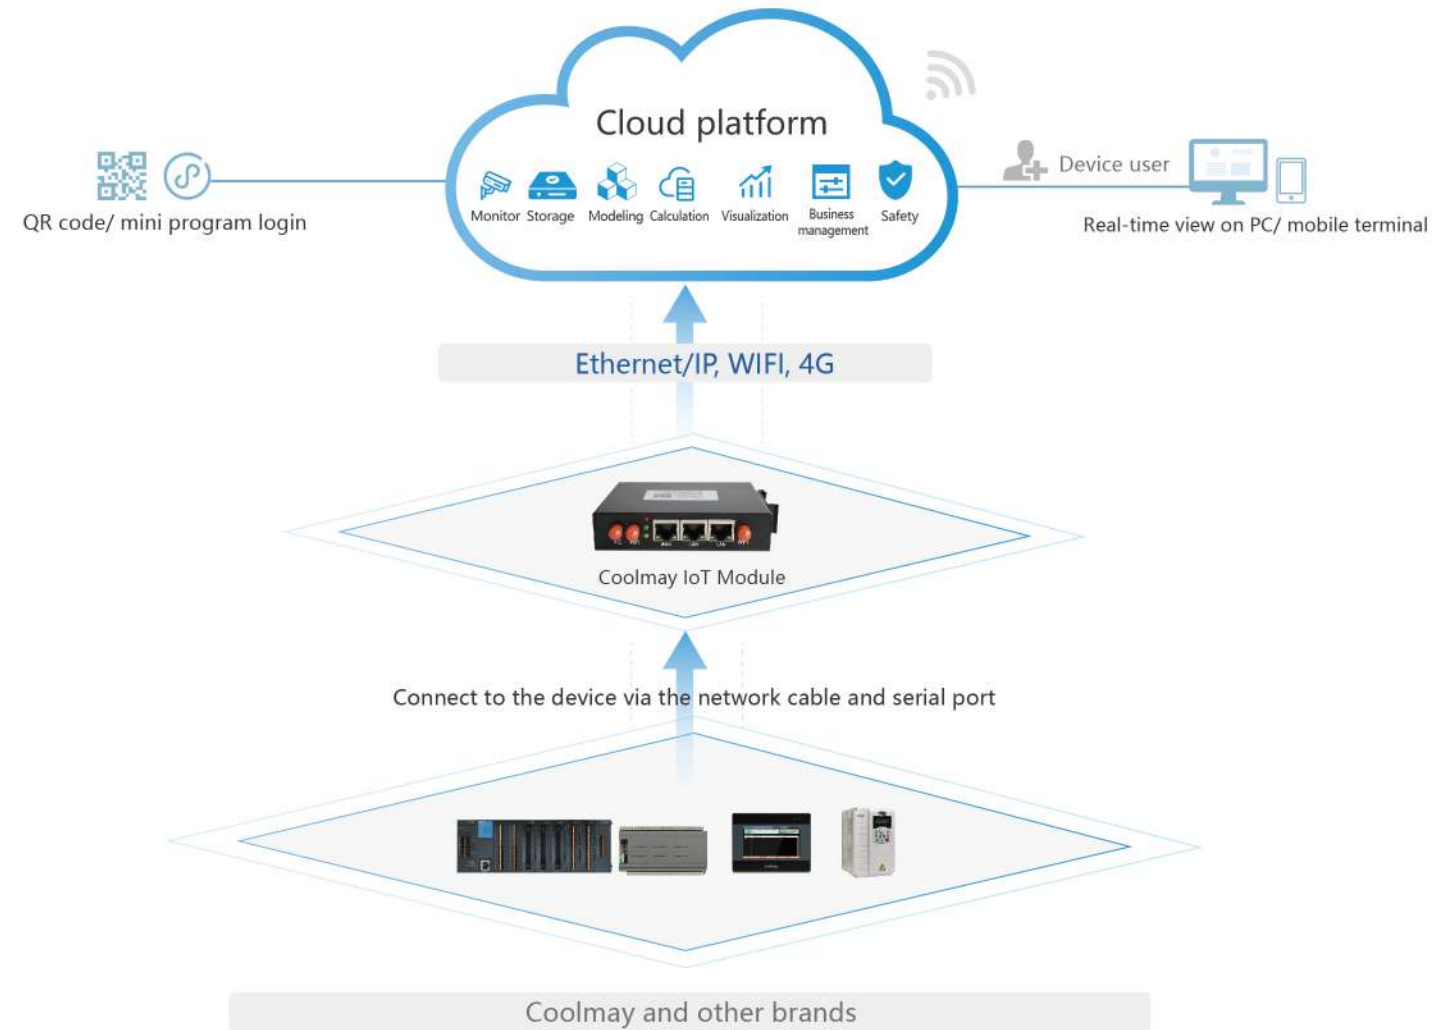

### One cable, one network

- Coolmay Ethernet/IP solution connects devices through network cables, simplifying wire material preparation and inventory
- Replace the traditional three-tier industrial network architecture and seamlessly connect with 100 Mb/s high-speed network

## Cloud platform

### Coolmay cloud platform

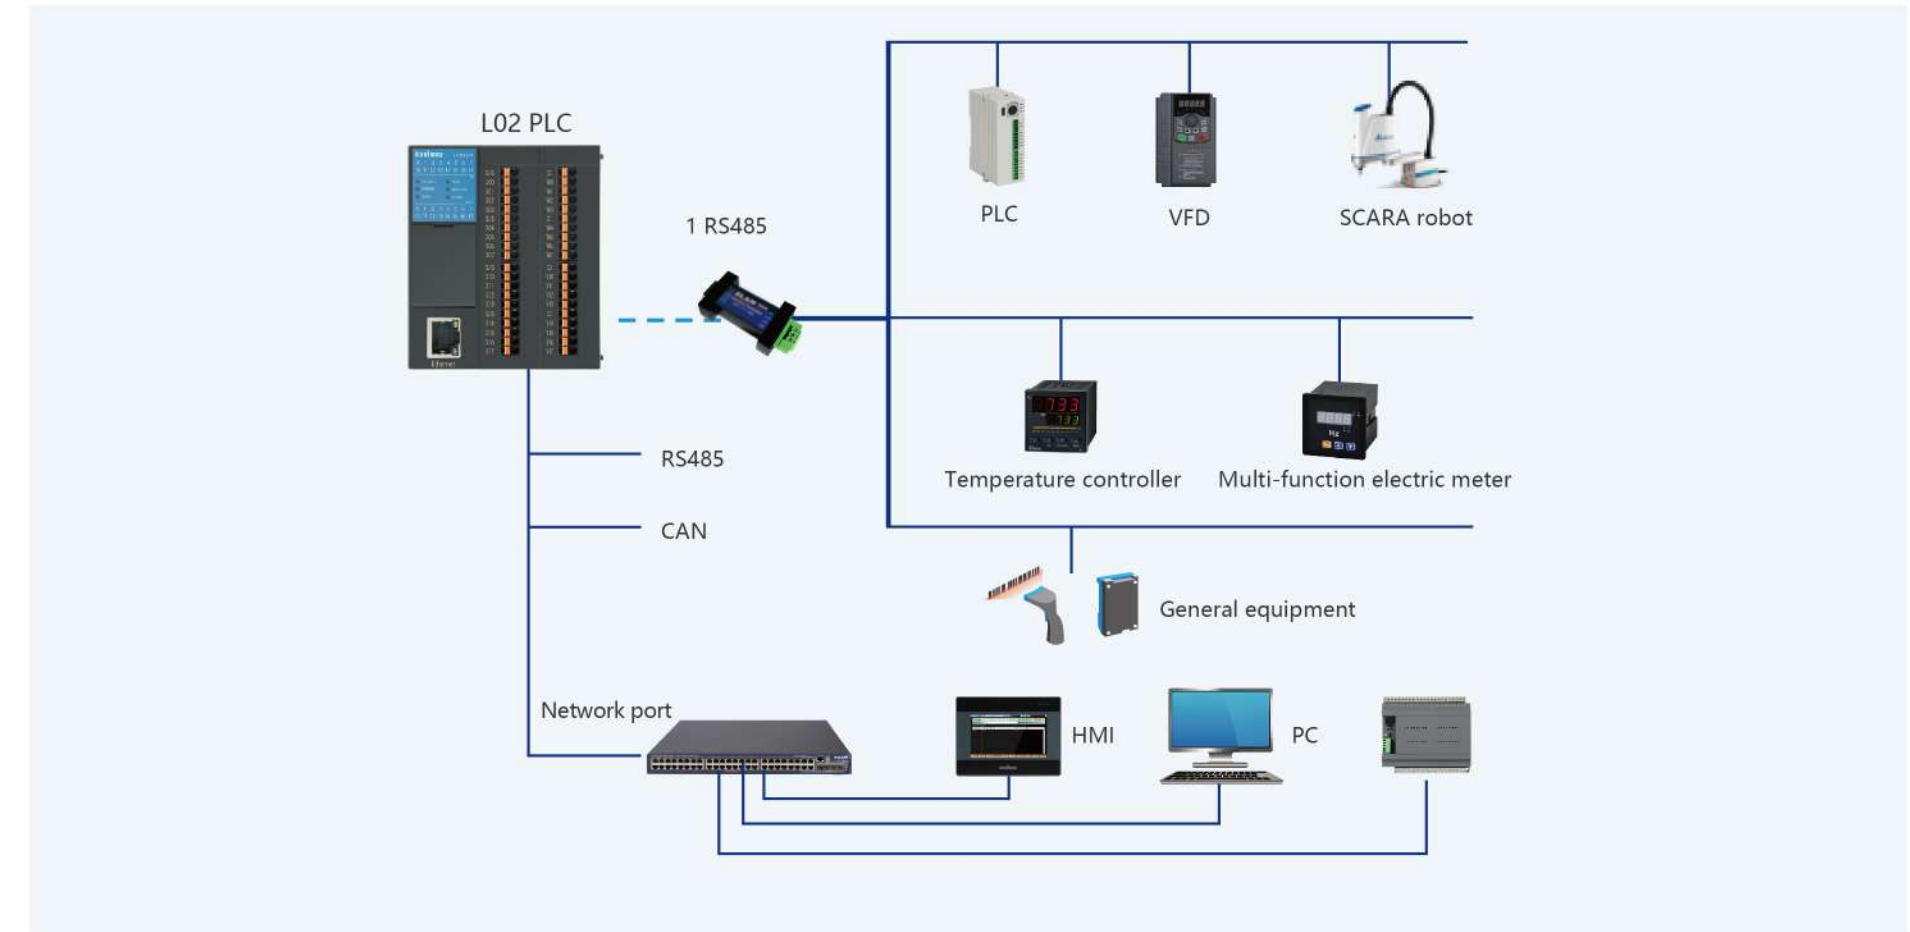

The platform is an IoT system that can complete terminal device data collection, real-time control, alarm push, group management, configuration design, video monitor and other functions in one stop.

## Serial communication solution

### L02 series host

- Two RS485 ports. Support Mitsubishi programming port protocol, Modbus networking protocol, Freeport protocol, Mitsubishi BD board protocol and N:N protocol, easily realize the interconnection between PLCs and the communication with external equipment such as human machine interface and VFD.
- One CAN port, supports CAN2.0A, CAN2.0B, Modbus networking and Freeport protocols, which can easily realize multi-channel interconnection.
- One high-speed Ethernet interface, supports Mitsubishi programming port protocol, Modbus TCP/UDP protocol, Ethernet/IP protocol.

## Multiple programming languages

Various programming languages can be used together in one project

### Ladder diagram (LD)

Used the most extensive ladder diagram, and an easy-to-use editing interface is provided to help users quickly to create program.

### Sequential function chart(SFC)

Express the actions of each stage in a flow chart, intuitive and easy to understand, suitable for applications that emphasize staged process control

## Multiple safety protection functions. Ensure the confidentiality of user program data

**Safety:** provides a variety of program protection functions, combined with the best application of security and performance

- The host is protected by 8-letter password
- Limited times for input errors
- Protection function that prohibits uploading

Special encryption 12345678, prohibit all data read or written

## Naming rules

### Host module

L02M32R/ L02M32T

L02	M	32	R, T
Series	General Controller Main Module	I/O points	Output type
		16DI 16DO	R: Relay output T: Transistor output

L02M24R/ L02M24T

L02	M	24	R, T
Series	General Controller Main Module	I/O points	Output type
		12DI 12DO+ 4AD 4DA	R: Relay output T: Transistor output

### Digital input module

L02-8EX/ L02-16EX/ L02-32EX

DO type	L02M32T/ L02M24T: transistor output, load max 500mA, low level NPN, COM connected to negative L02M32R/ L02M24R: Relay output, load max 2A, normally open dry contact, COM can be connected to positive or negative				
Default COM	Type-C, RS232, 2x RS485, Ethernet, CAN				
Protocol	Mitsubishi programming port Modbus RTU, Modbus TCP, Modbus UDP, freoport protocol, CAN, Ethernet/IP, Mitsubishi BD board				

## Product specification

Model	L02M32T	L02M32R	L02M24T	L02M24R	L02M24P
Data backup function. No need battery storage	Program	Flash ROM			
	Retentive area	MRAM, unlimited write-in times			
Calendar(RTC)	Commercially available batteries CR1620 (optional)				
Self-diagnosis	CPU abnormalities, internal memory problems, etc.				
Rated input voltage	Host	24 VDC (±10%)			
	Expansion module				

## Electrical and environmental specifications

Item	Specification	
Internal current consumption	Host	150 mA
	Expansion module	Relay output <150 mA, other modules < 80 mA
Operating temperature	-20~60°C	
Storage temperature	-20 ~ 70 °C	
Operating humidity	5 ~ 95%, no condensation	
Storage humidity	5 ~ 95%, no condensation	
Vibration resistant	Comply with international standards, IEC61131-2, IEC60068-2-6 (TESTFc), Sinusoidal 5-8.4 Hz 3.5 mm displacement, 8.4-150 Hz 1 G acceleration	
Shock proof	Comply with international standard specification IEC61131-2IEC60068-2-27 (TESTEa) half sine 15 g peak, 11 ms duration	
working environment	No corrosive gas exists	
Installation location	Inside the control box	
Pollution level	2
