

Technical Specification

3.5mm 3 Pole Male to AV 3 Screw Terminal Audio Video Connector

Modelo:

EP-CON35

epcom[®]
PRO AUDIO

Introduction

With this kind of rotary joint, the audio signal of 3.5mm three-section male head can be converted through the terminal, and the three terminal screw fixation bits correspond to different sound channels, which avoids the trouble of needing welding, and is more convenient and faster to use!

Characteristic

- Connector A: 3.5mm male.
- Connector B: 3 screw terminal blocks.
- Transmission voltage range: 5 (VA)
- Product connection mode: connecting screw solder connectors.
- A 3.5mm connector at one end and a 3-pin terminal block at the other end; Connects open wires to a 3.5mm jack.
- Wire gauge: 28AWG-16AWG
